MASTER'S DEGREE IN VETERINARY MEDICINE

1. Introduction

The training program aims to provide learners with in-depth knowledge of the industry and appropriate scientific research methods so that they can independently research and develop scientific opinions and theories, and initially form scientific ideas studying, discovering, discovering and testing new knowledge about the laws of origin, development and advanced technical measures in diagnosis, prevention and treatment of diseases in animals, preventing diseases from animals to people. Also, students continue to participate in the doctoral training program in Animal Pathology and Treatment, Veterinary Epidemiology, Parasitology and Veterinary Microbiology.

2. Curriculum

Code		Comman	Credit
Text	Number	Courses	
		I. General courses (2 courses)	
PHI	831	Philosophy	3
ENG	851	English	5
	1	II.1. Basis courses	
		A. Cores (14 credits)	
ABC	821	Animal biochemistry	2
APH	821	Animal physiology	2
VEF	821	Veterinary pharmacology	2
VEB	821	Veterinary microbiology	2
VEP	821	Veterinary pathology	2
RAV	821	Research Methods in Animal Husbandry - Veterinary Medicine	2
TOX	821	Toxicology	2
		B. Electives (6 credits)
